Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29, 32-37, and 41-50 drawn to a payment system between a customer and a merchant, classified in class 705, subclass 40.
- II. Claims 30-31 drawn to a payment card for a payment transaction between a customer and a merchant, classified in class 705, subclass 41.
- III. Claims 38-40 drawn to a cash withdraw system between a customer and an ATM machine, classified in class 705, subclass 43.
- 2. The inventions are distinct, each from the other because of the following reasons
 - Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I relates to a payment system between a customer and a merchant, whereas invention II relates to a payment card for a payment transaction between a customer and a merchant. Hence invention I has a different utility and scope than invention II. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II. Restriction for examination purposes as indicated is proper.
 - Inventions I and III are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I relates to a payment system between a customer and a merchant, whereas
